-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Applicants' remarks and amendments, filed on March 30, 2006, have been carefully considered. No claims have been canceled or added; claims 1-3, 5-7, and 10-32 remain pending in this application.

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Applicants' Priority Documents were filed on March 5, 2004.

Drawings

The replacement drawings submitted by Applicants on March 30, 2006, have been considered and are accepted.

Withdrawn Objections and Rejections

The objection to the Substitute Specification filed October 6, 2005, for the informalities therein, has been withdrawn in view of the proper copy of the clean version of said Substitute Specification submitted on March 30, 2006.

The 102(b) rejection of claims 1-3, 5-7, 10, 11, and 18, and 20-32 as being anticipated by Vanderborgh et al. (U. S. Patent No. 4,804,592), stated in the previous Office Action, has been withdrawn in view of Applicants' amendments and persuasive arguments traversing this rejection.

The 102(b) rejection of claims 12, 13, 16, 17, and 19 as being anticipated by Chen et al. (U. S. Patent No. 6,187,157) stated in the previous Office Action, has been withdrawn in view of Applicants' amendments and persuasive arguments traversing this rejection.

Maintained Rejection

The following rejection of record has been maintained.

Double Patenting

2. *Claims 1-3, 5-7, 10, 12, and 14-17 remain provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 2, 4-6, 8-12, and 14-17 of copending Application No. 10/509,752.*

Although the conflicting claims are not identical, they are not patentably distinct from each other because the respective sets of claims are both directed to mixed conductors, but do not define the mixed conductors in identical terms. However, the claims correspond to one another in the following manner:

Instant claims 1-7 and 7 correspond to claims 1, 2, and 8-11 of the copending application. Instant claims 5, 6, and 10 correspond to claims 4-6, respectively, of the copending application. Instant claims 12 and 14-16 correspond to claims 12 and 15-17, respectively, of the copending application. Instant claim 17 corresponds to claim 14 of the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

3. Claims 11, 19, and 21-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 13, 18, and 20-32 are allowed.

Applicants are respectfully informed that the indication of allowable subject matter in this Office Action could be withdrawn, pending the examination of Application Serial No. 10/509,752.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
